## outyet (godoc)

```
go get github.com/golang/example/outyet
```

A web server that answers the question: "Is Go 1.x out yet?"

Topics covered:

- Command-line flags (flag)
- Web servers (net/http)
- HTML Templates (html/template)
- Logging (log)
- Long-running background processes
- Synchronizing data access between goroutines (sync)
- Exporting server state for monitoring (expvar)
- Unit and integration tests (testing)
- Dependency injection
- Time (time)

## appengine-hello (godoc)

```
goapp get github.com/golang/example/appengine-hello
```

A trivial "Hello, world" App Engine application intended to be used as the starting point for your own code.

*Note*: The `goapp` tool is part of the Google App Engine SDK for Go.
